Name of the Programme: Science Sensitization Programme @ D.K.Z.P.H.P. School, Parapade, Mangaluru, Karnataka.

Date of the Programme: 7th January, 2022.

Objectives of the Programme:

- To exhibit curiosity experiments to the Students and Teachers.
- To create awareness about Acid and Bases.
- To educate students on the Science behind curiosity experiments.
- To develop Scientific Temper among the School Children.

Programme Report

Srinivas University under its Unnat Bharat Abhiyan Forum in collaboration with Sponsored NGO 'Srinivas Institute of Rural Reconstruction Agency' (SIRRA) and Dakshina Kannada Zilla Panchayat Higher Primary School, Parapade has organized "Science Sensitization Programme- Curiosity Experiments: 1. Acids and Bases" at Dakshina Kannada Zilla Panchayat Higher Primary School, Parapade, Mangaluru on 7th January, 2021. This Govt.

Higher Primary School is adopted by Srinivas University under the Government School Adoption Programme of Government of Karnataka. The programme aimed to develop scientific temper among the school children through curiosity experiments by teaching them the Science working behind the Acids and Bases and to motivate student participation by guiding students to perform simple scientific experiments. The resource person for the programme was Dr. Vasudeva Bhat, Research Professor, Srinivas University. The resource person has demonstrated curiosity experiments and explained the science working behind each of the performed experiments. Few experiments were carried out through students bringing in lots of joy in the young minds. Mrs. Rekah, Head Mistress, of the School and Teachers were present in the event. The programme was coordinated by Mr. Abdul Firoz and Mr. Sakku Appu Dooyipade student convenors for Government School Adoption Programme from Social Work Department of Srinivas University. Covid 19 protocol was followed with due care during the programme. About 30 students of the school participated in the programme and enjoyed the curiosity emerging out of scientific experimentation.

Students of Srinivas University, Institute of Education went trekking on March 19th and 20th 2020 to interview 2 of our Karnataka's Padma Shri winners from the tribal community. The Western Ghats trucking of our students, who always leave our institute, has come to an end due to landslides and floods during this year's wet season. According to Dinesh Holla, our trucking guide, the waterfall we observed during our visit is no longer visible. Rocks and muck abound throughout the forest, and quiet permeates the trees. While the western Ghats forests are being destroyed in this manner, it is a miracle that the Indian government honoured and recognized an illiterate woman from the Lambani tribe in our Uttara Kannada district this year for her efforts to preserve and grow the forest with the Padma Shri award.

Instilling in our future teachers a sense of responsibility for the preservation of our environment in light of modern civilization's innovations is a top priority for our generation. Light of this,

on the 19th, we took two buses carrying 75 students from the Institute of Education from Mangalore to Ankola, Uttara kannada. We stopped for breakfast in Kundapur, lunch at Honnavar, and a visit to the Mirjaan Fort on the national highway before arriving at the residence of Mrs Sukri Bomma Gowda, the 2019 Padma Shri recipient, in Ankola at 2:00 p.m. She is incredibly happy, and as soon as we all gathered in her courtyard, we started a conversation with her. Mrs. Sukri Bomma Gowda, an innocent halakki woman who was an illiterate adhivasi, astounded all of our students with her confidence, zeal, and social concern.

Our students were surprised by her ability to recall almost 4,000 folk verses. As she sang a song for us, she and her friends explained each word. The fights to advance the archaic tribal society and the drive for an alcohol ban were then thoroughly discussed with the pupils. The following day, we arrived at Tulsi Gowda's Ankola home, the 2020 Padma Shri winner. She is so innocent and at ease that she is unaware of the significance of the award bestowed upon her. We honored her and talked to her about the forest's seeds, the care with which they have been grown, and the method by which she has planted and grown the forest in Ankola. We recognized that her award was well-deserved. We were shocked when his family unexpectedly prepared and served lunch; the kindness of the communities must be sincerely acknowledged. We set out for Mangalore at two in the afternoon and arrived there at almost ten. For all of our teachers and students, the trip combines learning, socializing, and trucking into a singular, unforgettable experience.
