Anjali Ganesh Professor, Department of MBA, St.Joseph engineering College,Vamanjoor was the resource person.

Faculty Development Program on Emerging Technologies in ICIS Department 2019-20

Conduct a needs assessment to identify the specific emerging technologies that are of interest and relevance to faculty members across different disciplines. Design a comprehensive curriculum that covers various emerging technologies, such as artificial intelligence (AI), machine learning, internet of things (IoT), blockchain, virtual and augmented reality (VR/AR), 3D printing, and robotics. Develop instructional materials, resources, and case studies that illustrate the applications and implications of emerging technologies in different fields. Conduct hands-on training workshops, seminars, and webinars led by experts in the field to introduce faculty members to emerging technologies, demonstrate their practical applications, and provide guidance on how to integrate them into teaching and research. Facilitate collaborative projects and interdisciplinary collaborations that allow faculty members to apply emerging technologies to address real-world problems, conduct research, and develop innovative solutions. Provide access to state-of-the-art technology infrastructure, such as laboratories, software tools, hardware devices, and online platforms, to support faculty members in experimenting with and exploring emerging technologies. Explore pedagogical strategies and instructional design principles for effectively integrating emerging technologies into teaching and learning activities, including flipped classrooms, experiential learning, project-based learning, and gamification.
