Mangalore - India

Atomic Research Centre (ARC)

Centre for Primary prevention in Stroke

**Dr. Thrishala Noronha, Associate Professor
Institute of Physiotherapy**

1. Purpose of ARC: This Centre was established to investigate the awareness level of people in community about stroke and its risk factors and signs. This would be an attempt to build, define, apply, and share a robust evidence base for primary prevention strategies that can be applied at community level. The vision of this Centre is to be recognized as a creative and innovative world class Research Centre.

2. Objectives of ARC:

1. To advance research related to primary prevention in stroke.
2. To discover new strategies to create awareness among community dwelling individuals to reduce the disability rate related to stroke.

3. Description on Proposed Research: Includes finding the awareness level about stroke signs and symptoms and risk factors in the community and implementation of

innovative strategies for primary prevention of stroke.

4. Expected Outcomes: This would be an attempt to build, apply, and share a robust evidence base for primary prevention strategies for stroke that can be applied at community level.

5. List of the Team Members:

1. Dr. Radhika Gopal S
2. Dr. Pai Purva

6. List of Working Papers:

1. Awareness of stroke among people with Hypertension in Mangalore: A survey study.
