

Srinivas University

Mangalore - India

Atomic Research Centre (ARC)

Research Centre for Tool Validation

Dr. Jeyaganesh Vellaisamy (PT)

Associate Professor
Institute of Physiotherapy

1. Purpose of ARC: Outcome measure is an essential component of research area, in order to create the valid information by establishing through standard scales or tools. There is an increasing need for specific information associated with changing health and demographic trends of increasing prevalence diseases and treatment options. And it is a major area which demand global level focus towards quantitative and qualitative assessment tools. This research centre aiming to contribute the maximum effort to support it through its research work in order to add the evidences.

2. Objective of ARC:

- To establish an innovative research work to promote the evidence based practice.
- To enhance the usage of modified version of scales to measure.
- To promote the better outcome measure by gold standard measurements.
- To guide the students in the domain of validating the tools and utilize in creating new assessment tools.
- To mould the students in the area of research activities and publications.

3. Description on Proposed Research:

- Transcultural adaptation TAMPAscale for pain assessment

4. Expected Outcome:

Research plan under this cell helps in better utilization of the outcome measuring tools in multiple level of research process.

5. List of the Team Members:

- Dr. Prajna
- Dr.

6. List of Working Papers:

- Transcultural adaptation TAMPA scale for pain assessment
-

7. List of related Published Papers in Journals, Proceedings, Book Chapters, Magazines by Coordinator & his/her Group year wise in APA format.

- .

Name & Signature of Coordinator with date.
