SCOPE OF CONFERENCE

Computer Science plays an important role in the convergence of computing, communication and all other computational sciences and applications to satisfy our ever-challenging needs. In the past few decades, Computer Science has influenced and changed every aspect of our lives along with culture. This technology will also transform the world in various areas which includes Science, Engineering, Industry, Business, Law, Medicine, and other related areas.

CALL FOR PAPERS

Students, Research Scholars & Academicians are hereby invited and encouraged to publish their innovative ideas in this National Conference publication. The targeted theme of National Conference aims at research-based disruptive innovations in the fields of Engineering and Technology. This conference is aimed at researchers to seize the opportunities of innovations in processes and technology in diverse areas of science and engineering.

THEMES FOR THE CONFERENCE

- Data Science
- Cyber Security
- Blockchain
- Speech Technology
- Machine Learning
- Internet of Things
- Image and Video Analytics
- Fog and Cloud Networking
- Augmented/Virtual Reality
- Wireless Sensor Networks

BEST PAPER AND POSTER

PRESENTATION AWARD

Conference expert committee will select the best research paper and the best poster presentation at the conference.

REGISTRATION DETAILS

CATEGORY	REGISTRATION FEES
Academic Institutions, Industry and Research Establishments	₹ 750/-
Research scholars, UG & PG students of all institutions	₹ 500/-

DEPARTMENT OF COMPUTER SCIENCE ENGINEERING

Computer Science Engineering is one of the most sort after disciplines in Engineering. It is the practical and scientific approach to its application. This is the most lucrative and competitive course to study. Computer Science & Engineering involves the design and understanding of computational process and programming languages. In computer science engineering, we learn and understand Algorithms, Programming languages, Operating Systems, Database Management Systems, Computer Network, Computer Graphics and Artificial Intelligence. Software Products and Solutions are used in almost all Industries across the World. Major Industries which uses Software are Banking, Insurance, Retail, Power, Exploration, Aeronautics, Defence, Consulting, Online Shopping and Big Data Analytics.
