Mr. Shylesh S.

There is a huge disconnect between security professionals and systems developers. Security professionals are primarily concerned with the security of a system, while developers are primarily concerned with building a system that works. While security is The World Wide Web, more commonly known as the Web, is increasingly pervading every aspect of our lives. In the 15 years since the Web came into existence, our lives and work have been inexorably changed. It has dramatically influenced us in several ways and has.
