Academic features – Time Table

Time Table (including Time Table generation)

Time Table can be uploaded to the system in two methods. If the TT is already created and available, it can simply be uploaded using a specific template or the In-Built Time Table generator can create the Time Table for the entire institution within a few minutes by providing the constraints. Once created, TT can be viewed either day-wise or date-wise with edit option in both views.

Academic features – Lesson Plan

Lesson Plan

Creating of lesson plan at the beginning of the term can be tedious task. The in-built lesson plan generator can create a day-wise plan for every course with a click of a button. This will be in line with the syllabus prescribed by the governing university considering the time table and calendar of events along with the holiday calendar. It can then be edited by the faculty to fit their needs. Once approved, lesson plans will be visible to all stake holders. Therefore, keeping everyone updated and informed. Lesson plan can also be linked or de-linked with Time Table. Lesson plan directly contributes to criteria 2 of NBA.

The screenshot displays the Lesson Plan management interface, divided into three main sections:

- Dashboard (Left):** Shows course details (BE-43-ML33K3735-7-B-CBC3), buttons for 'Clone Lesson Plan' and 'View Lesson Plan', and a 'Create Lesson Plan' button with term dates (31 Jul 2018 & 31 Jul 2019). It also displays 'Planned Effort (Till Date)' as 56 classes (52 hrs 35 min) and 'Actual Effort (Till Date)' as 44 classes (59 hrs 0 min), with a 'Portions Coverage' of 78% Completed (lagging).
- Lesson List (Middle):** A table of lessons with columns: Period, Date, Class Type, Execution Method, Module, Topic, Planned Effort, References, Status, and Edit/Delete. The table shows 11 lessons, all with a status of 'Approved'.
- Update Lesson Plan Form (Right):** A form for editing a lesson. It includes fields for 'Period' (52), 'Date' (28 Feb 2019), 'Module' (Module 5), 'Lesson' (3-Reinforcement Learning), and 'Topics' (Learning Task: Write topic and press enter). It also has dropdowns for 'Material' (REF 1), 'Course Outcome' (CO 1), 'Execution Methods' (Lecture), 'Class Type' (Regular), 'Bloom's Level/Learning Outcome' (Analyze), and 'Learning Validation Method' (Surprise Test). The 'Planned Effort' is set to 1 hour and 0 minutes. 'Update' and 'Reset' buttons are at the bottom.

Academic features – Internal Assessment

Internal Assessment

From creation of Question papers, getting approvals from internal committees, downloading in the required format, tabulating marks at question level for each student, etc. all these activities which are required for CO attainment calculation can be done easily and quickly along with graphical analysis of results. Other assessments like quiz, unit test, etc. can be published as additional learning evaluation methods. IA can be configured to suit the needs of the institute. IA directly contributes to criteria 3 of NBA.

Academic features – Co-curricular activities

Co-curricular Activities Different types of activities such as events (workshop, seminar, conference), projects, industrial interaction (Signing MOU, Lab setups, student visits), Publications, patents, awards, Memberships can be added and tracked. Reports can be generated. All these directly contribute to criteria 5 of NBA.

Academic features – Student feedback

Feedback

Be it a course level feedback or a feedback on infrastructure of the institute, the system allows the institute to configure any kind of feedback with custom categories, questions, feedback scale and the flexibility to trigger it for a fixed time frame. Student can also provide feedback anonymously. Feedback contributes to criteria 3 of NBA.

Feedback 1	3.8	3.56	4.5	4.33	4	3.67		

Academic features – Placement

Placement

Starting from downloading the eligibility list based on the criteria set by the visiting company in an excel that can be sent to the HR of the company to track student's performance in every round of interview to sending notifications and more. The integrated placement module can relieve most of the administrative tasks allowing the placement department to concentrate on bringing in more opportunities for the students. Placement results contribute to criteria 5 of NBA.

Academic features - Counselling

Counselling

Faculty student relationship is a key factor for students to perform well. This can be achieved through the counselling program. The software allows for mapping of specific number of students to a faculty for all mentoring purposes. Mentors can then schedule meetings with students on specific topics and update progress for future reference.

Administrative features (HR) – Faculty Performance Appraisal

Faculty Appraisal Management System

The faculty performance appraisal module provides comprehensive and real-time scores for every individual to monitor their own performance. With over 25 attributes on which every faculty can be measured, the institute can configure the system differently at an individual level. Authorities can view real-time reports such compliance of all daily activities by every faculty and others. The system provides multiple scores for every faculty using which appraisal, salary revision and promotions become hassle free and transparent.

The dashboard provides a comprehensive overview of faculty performance. It features a sidebar with navigation options: My Dashboard, Attendance, Leave Management, Faculty Performance, and Admin Tools. The main content area is divided into several sections:

- Faculty Performance Summary:** Displays overall performance metrics for the selected period (2016-17).
- Course Performance:** Shows scores for Course Result and Coverage.
- Feedback and Counselling:** Displays scores for Feedback and Counselling activities.
- Project and Placement:** Shows scores for Project (Guided, Initiated, Consulted) and Placement (Seminar, Workshop).
- Event Performance:** Displays scores for various events.
- System Generated Score, Self Appraisal Score, and Supervisor Points Score:** Provides detailed breakdowns of these scores.

The dashboard uses a color-coded system to represent different categories and includes filters for Department and Designation to allow for granular analysis.

Administrative features (HR) – Leave Management System & Biometric

Leave Management System

The extensive and generic Leave Management system allows the institute to create and specify rules for any type of leave for every category of employee. Leave approval flow too can be configured based on the rules defined by the institute. Faculties going on leave can transfer their classes to other faculties who are free. With an add-on option to integrate with an existing biometric attendance system, employee leave report for salary processing can be obtained with a click of a button.

The screenshot displays the Leave Management System interface. At the top, there is a navigation bar with a menu icon, a dropdown menu set to 'B.Tech', a search bar labeled 'Search Profile', and the user's name 'College Admin [COLLEGE ADMIN]'. Below the navigation bar, there are date pickers for 'From Date' (5/8/2019) and 'To Date' (7/2/2019), a 'Go' button, and filters for 'Department' and 'Status'. A search box labeled 'Search by Name' and two buttons for 'Download Excel' and 'Download PDF' are also present. The main content area shows a table of leave entries with columns for Date, Employee Name, Employee Id, Department, In Time, Out Time, Status, and Leave Status. The table displays 10 entries for the date 20-06-2019. At the bottom, there is a pagination bar showing 'Showing 1 to 10 of 8,821 entries' and a page navigation control with buttons for 1, 2, 3, 4, 5, and 883.

Examination features

Examination Module

Be it an affiliated institute, an autonomous college or a private university. The integrated examination module comprehensively covers every step of conducting an exam. Processing the student eligibility list based criterion configured by the institute, allowing students to register for exams, issuing of hall tickets, setting and scrutinization of multiple question papers, automatically generate seating arrangements and invigilator allocation, capturing student attendance, answer script packeting, evaluation and moderation, tabulation and automatically calculating results based on the rules of the university/institute, our system will reduce administrative work to large extent making conduction of examinations easy and efficient.

The screenshot displays the HERAIZED examination management system interface, which is divided into three main sections:

- Dashboard (HERAIZED):** This section shows a navigation menu on the left and a main area with three exam flow diagrams. The top diagram is titled "PROGRAMME WISE EXAMINATION CYCLE", the middle "MODULE AND END SEM EXAM PAPER LISTING", and the bottom "SAS (STRUCTURE AND APPLICATION CYCLE)". Each diagram illustrates the steps from "Schedule Announcement" to "Scrutinization & Results".
- Seating Matrix (HERAIZED):** This section shows a "SEAT MATRIX" for a specific exam. It displays a grid of 10 benches (Bench 1 to Bench 10) with a "Marked" column and a "Unallocated" column. The interface includes filters for "Name of Invigilator", "Room Capacity", and "# of Students Allowed".
- Hall Ticket (SPACEOS):** This section shows a "Release Hall Ticket" screen. It displays a "HALL TICKET" for SRINIVAS UNIVERSITY. The ticket includes a table for exam details and a table for the exam schedule.

Accreditation features

Outcome Based Education (NBA)

With all the above information already available in the software, calculating/processing results based on policies set by different governing agencies will be as easy as clicking of a button. The integrated NBA module provides 7 levels of drill down from viewing the overall score to the lowest level where each student's contribution to the score can be viewed. This will help the institute to exactly pin the weak spots and take necessary action to rectify them. SAR can be generated at a sub-criteria level. Descriptive and prescriptive analytics will be provided as part of the NBA real time dashboard which can act as a readiness check for accreditation on a real time basis.

Administrative features – Pre-Admission

Pre-Admission and Admission

A student's relationship with the software starts as early as applying for a seat (Management quota) in the college by a custom-built application form that can be hosted on the institute's website. Admitted students can register themselves using simple registration forms that will automatically create logins for them. Complete admission information is captured, and the complete admission process is automated.

Administrative features – Fee collection & Tracking

Fee Collection and Tracking

The integrated fee module can be used to track every single transaction of every student of every term. Intensive reports on the dashboard will help the accounts department to track fees, scholarship etc. irrespective of the mode of payment. Fee structure and fee receipt templates can be configured based on the institute's needs. Reminders can be sent to students/parents regarding the payment of fees with a click of a button. Defaulters report can be generated at any point. The generic design of the module makes it easy to integrate with any payment gateway with little effort. Offline integration with tally can be done for financial data.

Dhi features - 5

Grievance Management System

The grievance management system allows students and others to post grievances anonymously about any pre-defined topic. Specific employees can be configured to handle grievances of specific topics and resolutions can be updated.

Hostel

The integrated hostel module provides complete overview of the facilities provided in every room of every hostel. Once configured, rooms can either be manually allotted or automatically allotted to students on a first come first basis. Mess bill calculation, fines and student's service request are some of the key features. Gate pass for students wishing to out of the hostel on holidays and vacations can be configured based on the needs of the institute.

Alerts/Notifications & Notice Board

Across the system, notification and alerts can be sent via 3 ways. Push notifications, SMS and emails. A separate Open Notice Board for institute/department level communications is available in every role's dashboard.

Reports

More than 40 reports are generated at real time. Course-file for teaching faculties being one among them, contains every academic information from start to finish of the term for all subjects the faculties handle. The file contains the complete Lesson plan, TT, CO-PO mapping, feedback reports, IA scores and averages of all students etc.

Manage Results / Result Processing Configuration

Degree: B.Tech Schema: CBCS 2017 [Edit Configuration](#)

Do you want overall result to be shown if subjects are marked with X, I, W grades? Yes No

If Yes, result will be shown as : FCD,FC,SC, etc.
If No, result will be shown as :-

Do you want to download transcript report, even though student has backlogs ? Yes No

Do you want to display SGPA for failed students ? Yes No

Do you want to display overall results name in results sheet ? Yes No

If Yes, value will be shown in full form, ex: First Class with Distinction
If No, value will be shown in short form, ex: FCD

Truncate CGPA & SGPA decimals from : 3 Decimals 4 Decimals

If '3 decimals' is selected, ex: CGPA value like 9.567 will be truncated to 9.57
If '4 decimals' is selected, ex: CGPA value like 9.5677 will be truncated to 9.568 & finally to 9.57

Exclude arrear courses while calculating SGPA? Yes No

Include regular courses while calculating arrears SGPA Yes No

Calculate SGPA and CGPA exam identifier wise Yes No

If Yes- SGPA and CGPA will be calculated exam-id wise i.e SGPA and CGPA will be the same for all semesters in the exam-id
If No- SGPA and CGPA will be calculated semester wise i.e SGPA and CGPA will be calculated separately for all semesters in the exam id

Should result be considered as "Conditional" if student passes after adding subject credits? Yes No

Classification in transcript should be displayed only for students who has completed the degree Yes No

Select result generation strategy Exam-Id based Course term based

Transitional Grade: I,W,X CGPA Exclusion Grades: SGPA Exclusion Grades: # of decimal places in CGPA: 2 # of decimal places in SGPA: 2
