

**Dr. Praveen B M**

M.Sc., Ph.D., P.D.F ( IISC- Bangalore and South Korea)

**Specialization: Nano Composites, Corrosion Inhibition, Electrodeposition**

Dr. Praveen Has Completed PhD in 2008 and Post Doctoral research in Indian Institute of Science, Bangalore and Ajou University- South Korea.

He is working as Director – Research and Innovation Council of Srinivas University and Chief Coordinator of College of Engineering and Technology. He has received Research fund of worth 1.2 crore rupees from AICTE, DST, VGST, ISRO and BRNS. He is a recipient of Young scientist award from Department of Science and Technology- New Delhi. Best Research paper award from VGST Govt of Karnataka. He is received the Prestigious Commonwealth Professional Fellowship and worked in UK. He is also working as Visiting Professor in University of Malaya – Malaysia. Three students completed Ph.D under his guidance and three more working under him. He has more than 100 publications and 5 books in his credit.

Dr Praveen mainly working on corrosion inhibition studies. He has developed more than 100 eco friendly corrosion inhibitors for Steel and Zinc metals. He also developed the Nano composites of zinc and Nickel metal for corrosion inhibition studies. Recently he is working on Nano structured multilayer coatings and Noble metal coatings.
